

Solar Energy South Africa

Rear mounted solar generator set

Overview

An Electric Winch is a motorized device used for lifting, pulling and positioning of loads. It is typically mounted to a vehicle's front or rear bumper and is powered by direct current electricity provided by the vehicle's electrical system.

Safety on a building site or construction environment is paramount so our Jacks are ideal for transferring structural loads or as structural support whilst working on site. Products such as Bottle & Toe Jacks as well as Cable Reel.

Our Forklift Hire eliminates the need for manpower and reduces the amount of time required to move goods. Ideal to move things up and down to higher locations than what could.

Hire a Bumpa Hoist to make easy work of transporting roof slates and tiles up to the working level quickly and with little effort. The units belt moves both.

Our range includes Gentries and Hoists used for lowering and lifting both equipment and people below ground level. You can choose from a Porta Gantry, Hoist or a Beam Trolley.
