What Types of Rechargeable batteries for Solar Panels

Ways of Charging a Rechargeable Battery. Rechargeable batteries have positive and negative terminals, making them a "cell." Most cells today are actually made up of multiple cells inside. The lead-acid battery consists of six separate cells combined in series to make 12 volts. You can charge a battery using a solar panel in two ways

Looking for 'AA' rechargeable battery with solar recharger.

In order to avoid the memory effect, NiMH chargers need a constant source of power, and a solar panel isn't one, unless it has a built-in lithium ion cell or power bank. I went a la carte with a Tomo M4 connected in-line between my 21W folding solar panel and the AA charger. The M4 acts as a UPS and stabilizes the power from the solar panel.
