

Solar Energy South Africa

Romania quality energy solutions

Overview

What is the energy sector like in Romania?

Romania's energy sector is key to its evolving economy and security policy. It has a diverse energy mix, including coal, natural gas, nuclear, hydroelectric, and renewable sources. The largest share of electricity production historically came from coal and natural gas, followed by hydroelectric and nuclear power.

Who manages the electricity transmission system in Romania?

The electricity transmission system in Romania and the interconnection system with its neighboring countries is managed and operated by Transelectrica SA company (the Romanian TSO). They also manage the market operation, the grid and market infrastructure development, and the security of the national energy transmission system.

What is Romania's energy transformation?

Renewable energy sources, nuclear power (via completion of Cernavoda NPP Units 3 and 4, refurbishment of Unit 1, and deployment of SMRs), and natural gas - the latter considered a transitional energy source - form the backbone of Romania's energy transformation. Romania's coal production is expected to decrease by 12.5% in 2023 .

Where does Romania import electricity?

Romania exports and imports electricity to and from neighboring countries, including Hungary, Bulgaria, Serbia, Ukraine, and Moldova, and is also part of the European Union's internal energy market, which aims to create a single, competitive market for electricity and gas across EU member states.

Why does Romania support a long-term perspective of natural gas?

Romania supports a long-term perspective of natural gas in the European Green Pact because it forecasts that this resource will remain an important tool in changing the energy sector and transitioning to a more sustainable and

carbon-free economy.

Will Romania's coal production decrease in 2023?

Romania's coal production is expected to decrease by 12.5% in 2023 . This was due to the pandemic-induced worldwide crisis, followed by the geo-political context in the area due to the Ukrainian war, but also because of the orientation shift from conventional energy sources to renewable energy.

Romania quality energy solutions

Home

Quality es una empresa que nace de la búsqueda de la eficiencia energética aportando un valor añadido a la optimización del consumo eléctrico. Asumimos todas las gestiones necesarias para que sean precisamente nuestros clientes quienes adquieran a través de nuestras acciones diarias una reducción en el coste de la factura eléctrica y de

About us

Our forward-thinking team is dedicated to creating a greener future for Romania. By combining international expertise with our local track record, we serve as a credible partner for developers and investors alike. We aim to build the highest quality renewable energy projects that contribute to a more sustainable path forward.

AJ BRAND - Sustainable and Renewable Energy Solutions

Hands-on experience in high-quality execution of Wind Farms and Photovoltaic Parks in Romania, Spain, Portugal, and Italy. Top services tailored to your business character and needs, The creation of solar energy plants is a long process, beginning with the conception of an idea and ending with the realization of energy production after
