

## Solar Energy South Africa

# Russia ems energy

## Overview

---

What is Russia's energy strategy?

Russia's energy strategy prioritizes self-sufficiency in gasoline, so it tends to export minimal volumes. However, Russian refiners produced roughly double the diesel needed to satisfy domestic demand, and typically exported half their annual production, much of it to European markets.

What is Russia's solar energy potential?

It has been estimated that Russia's gross potential for solar energy is 2.3 trillion tce. The regions with the best solar radiation potential are the North Caucasus, the Black Sea and the Caspian Sea areas, and southern parts of Siberia and the Far East.

Does Russia have a refining capacity?

Russia has an estimated 6.9 million bpd of refining capacity, and produces a substantial amount of oil products, such as gasoline and diesel. Russian companies have spent the last decade investing heavily in refining capacity in order to take advantage of favorable government taxation, as well as growing global diesel demand.

Is Russia moving away from fossil fuels?

Russia is home to some of the leading energy companies across the globe, such as Gazprom, Lukoil, and Rosneft. In 2022, seven out of ten Russians stated that it was important to them that their country shifts away from fossil fuels. Discover all statistics and data on Energy sector in Russia now on [statista.com](https://www.statista.com)!

Where does Russia produce oil & gas?

Russia has oil and gas production facilities throughout the country, but the bulk of its fields are concentrated in western and eastern Siberia. China is the largest importer of Russian crude (making up 20% of Russian exports), but

Russia exports a significant volume to buyers in Europe.

How much oil does Russia produce a day?

In 2021, Russian crude and condensate output reached 10.5 million barrels per day (barrels per day), making up 14% of the world's total supply. Russia has oil and gas production facilities throughout the country, but the bulk of its fields are concentrated in western and eastern Siberia.
