[Shipping Services To St Helena](#)

SHG has been made aware that the operation of an additional sea freight service to St Helena is being considered by a private shipping company, under the agency of Meihuizen International. Last year SHG invited tenders from parties interested in providing a longer term sea freight service to the island. Following a procurement process, SHG [...]

Can a city's water infrastructure produce hydropower?

Dams that use a stream of water to turn a turbine and create electricity are common around the world, producing zero-carbon, reliable power for cities. Hydropower is now the largest source of renewable electricity in the world, accounting for 1,200GW of installed capacity, or 17% of global electricity.

[Kaligandaki Upper hydro project, Nepal](#)

Kaligandaki Upper hydro project is a run-of-river project. The gross head and net head of the project will be 150m and 139.09m respectively. The penstock length will be 123.44m. The penstock diameter will be 4.5m. The project cost is expected to be around \$88.516m. The hydro power project consists of 2 turbines, each with 32.5MW nameplate ...

incomes, and other topics including exchange rates, production, construction, utilities, and aid. For summary charts and commentary on these topics, please visit the Economy section of [...]

Swedish court approves Hydro Energi/Markbygden PPA settlement

The settlement plan, which is subject to closing requirements, is expected to be finalised in November 2024. Despite these challenges, Hydro's Norwegian smelters maintain a decent sourcing situation through 2030, based on an average annual equity hydropower production of 9.4TWh and a long-term contract portfolio of 10TWh annually.

Partnership Between UK Government and St Helena Government ...

The UK recently announced an agreement with Mauritius concerning the BIOT/Chagos Archipelago. The UK Government (UKG) and St Helena Government (SHG) have today reached a cooperation arrangement in relation to future migrants arriving on the British Indian Ocean Territory (BIOT). No new migrants have arrived on BIOT since 2022, however, ...

[Hydropower: why should we use it?](#)

Nations with an existing resource of hydropower often use it as a base load energy source. Water is a domestic energy source, meaning countries with a water supply can produce their own electricity independently of international fuel supplies.

Partnership Between UK Government and St Helena Government ...

This is a long-term, consistent partnership. We will support St Helena by providing technical support, and funding the transfer and subsistence costs for any migrants affected. Of course, this is not the first time that St Helena

has supported the wider UK family. The agreement is testament to its integral place in our family.

St. Helena Views consists of phases 1, 2 and 3 on the land comprising portions of Erven No.'s 35, 37

What does the future hold for hydropower energy?

Hydropower plants without dams, also known as run-of-the-river plants, use the natural flow of rivers and small turbine generators to produce energy. At the moment, this is only available at a small-scale with micro (<100kW), mini (100kW - 1MW) and small (1 - 50MW) plants available.

5 Facts You Should Know about Hydropower

Hybrid hydropower systems are also gaining traction, where hydropower reservoirs are paired with floating solar panels to create multi-source energy plants. This approach allows for efficient land use and provides a dual energy output that enhances reliability, particularly during dry seasons when water levels may be lower.

Maritime

Maritime Administration St Helena is situated in the South Atlantic Ocean, at 15° 56' South, 005° 45' West; the coast of Africa is 1,200 miles (1,950km) due East, and the coast of South America is 1,800 miles (2,900km) due West. It is this ...

Maritime

Maritime Administration St Helena is situated in the South Atlantic Ocean, at 15° 56' South, 005° 45' West; the coast of Africa is 1,200 miles (1,950km) due East, and the coast of South America is 1,800 miles (2,900km) due West. It is this isolation that has gained the Island a long maritime history, associated with [...]
