The 3 megawatt solar farm will generate 7 million kilowatt-hours (or units) of electricity per year, which is about 1.3% of the electricity generated from LUCELEC's Cul De Sac Power Plant. It will reduce the annual volume of fuel purchased by LUCELEC by about 300 thousand gallons.

Just shy of fifteen thousand solar panels, the St. Lucia Electricity Services Limited (LUCELEC) 3MW Solar Farm in La Tourney, Vieux Fort is now feeding solar energy into the island's electricity grid.

On the 11th April 2018, the St. Lucia Electricity Services Limited (LUCELEC) - the sole electric utility company on the island - completed the commissioning of the island's first utility-scale solar PV plant. The plant is rated at 3 megawatt (MW) and is located in La Tourney, Vieux Fort, just north of the Hewanorra International.

LUCELEC and the Government of St. Lucia aim to supplement the diesel generators with renewable energy systems including PV in order to reduce the negative effects of burning fossil fuels, stabilize electricity rates, and reduce energy production costs.
