## American Samoa: Unlocking Renewable Energy Potential

o In 2016, the American Samoa Renewable Energy Committee adopted a goal to meet 50% of the territory's energy needs from renewable resources by 2025 and 100% by 2040. oClean fuel vehicle diesel A net-metering law was adopted in 2008 to allow small renewable energy generators

## WOLLEMI PIONEERS NATURE-BASED CARBON PROJECTS AS

For these projects, RegenCo has partnered with digital twinning platform Agronomeye to collect data across more than one million hectares of farmland, measuring the precise height and diameter of over 30 million trees, in order to rigorously baseline and measure carbon sequestered. Read more about our project portfolio with RegenCo >

## Samoa's renewable energy sector: what is the state of play?

Samoa's transition to renewable energy by 2025 was a given - oh well, that was the messaging we were getting, during the term of the last Administration - so you can imagine the shock at revelations by Olo Fiti Vaai that the last government had ceased renewable energy development projects.

## Samoa Observer , Renewable energy target on track

According to EPC's Annual Report 2019-2020, 45 per cent of electricity was generated from

renewable energy. Most of the electricity in Samoa, particularly for the main grid, is generated from diesel, hydro-power and solar power generation stations and a very small amount of electricity is produced from wind energy and biomass resources.
