Californian lithium sulfur battery maker lightens the load for Northvolt

San Jose-based Lyten has acquired lithium metal battery technology company Cuberg from Swedish manufacturer Northvolt, which is battling to reduce costs. The acquisition of Cuberg make sense as lithium sulfur products can be manufactured on lithium-ion battery production lines, as Lyten Chief Battery Technology Officer Celina Mikolajczak

Northvolt raises \$2.75bn to increase battery production capacity

Northvolt's private placement was co-led by new investors AP funds 1-4, via the co-owned company 4 to 1 Investments, and OMERS Capital Markets, together with existing investors Goldman Sachs Asset Management and Volkswagen Group.. Other existing owners, namely AMF, ATP, Baillie Gifford, Baron Capital Group and Bridford Investments, also ...

Troubled Northvolt Sells US Battery Plant to California Startup

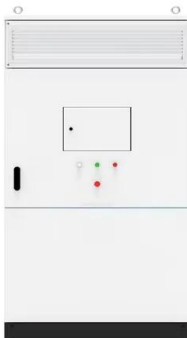

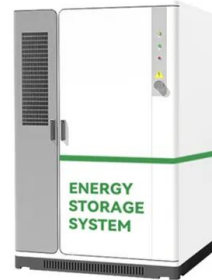

Northvolt AB, the cash-strapped European battery maker, reached a deal to sell its US factory to a startup that's trying to reduce America's reliance on China for batteries.. Lyten, a California startup developing lithium-sulfur batteries, will invest \$50 million over the next

several years as part of an agreement to buy battery manufacturing equipment from Northvolt, take ...

Northvolt selling cathode and ESS sites, sharpening focus to

...

Northvolt also has an energy storage system (ESS) assembly factory, Northvolt Dwa in Gdansk, Poland, which executives discussed with Energy-Storage.news a year ago (Premium article). Following the strategic review, the company now appears willing to sell the factory entirely. It said it will 'enter into discussions with potential future

Northvolt files for Chapter 11 reorganization , Northvolt

Process will help secure Northvolt's long-term mission to establish a homegrown, Western industrial base for battery production; Stockholm, Sweden - Northvolt AB and certain of its subsidiaries ("Northvolt") ...

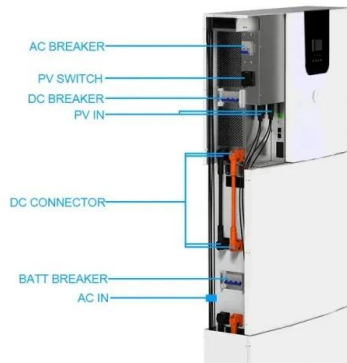

Northvolt sees 'fierce global competition' in energy storage market

The factory obtained its use permit in May, produced its first products in August and expects to begin commercial deliveries later this year, Robert Chryc-Gawrychowski, CEO of Northvolt Poland said. It will have an initial annual production capacity of 5GWh, rising to 12GWh in future, and builds on its battery cell production, battery material

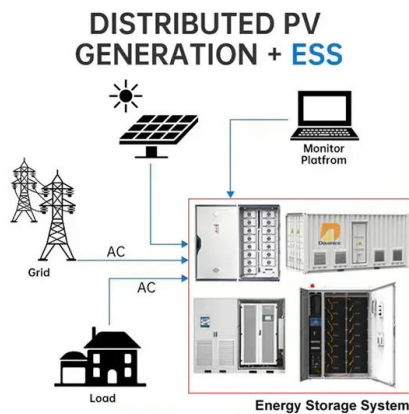

Europe backs Northvolt with US\$5 billion loan package

Northvolt's battery recycling plant in Sweden. Image: Northvolt. European lithium-ion battery developer and manufacturer Northvolt has secured a US\$5 billion (EUR4.6 billion) non-recourse project financing package from various EU and Nordic institutions for its manufacturing and recycling plants.

Sustainability

That's why Northvolt batteries are sustainable by default. And we've taken a close look at the manufacturing setup to get there. We've committed to powering cell production with fossil-free energy, invested into innovation of process design to optimize use of resources and established an in-house battery recycling business to reduce

Guest editorial from Harald Mix, Co-Founder of Northvolt

Harald Mix is a Co-Founder of Northvolt and shareholder, Co-Founder and Chairman of Stegra (previously known as H2 Green Steel) and Chairman of Vargas Group. The following article has been translated to English and abridged, following original publication as an OpEd in Dagens Industri, October 15, 2024.

Northvolt raises \$1.6bn in financing for lithium-ion battery plant in

The company is also investing in battery cell technology, process development and recycling at the recently established factory Northvolt Labs, in Västerås, Sweden, where the first battery cells were produced in late 2019. Northvolt co-founder and CEO Peter Carlsson said: "The momentum for electrification is stronger than ever."

Northvolt and Stora Enso partner to produce wood-based batteries

Lignin is a polymer derived from the cell walls of dry-land plants. It can act as a natural and strong binder. As part of the collaboration, Stora Enso will supply its lignin-based anode material Lignode, while Northvolt will be responsible for the cell design, technology and production processes. Stora Enso Biomaterials executive vice-president Johanna Hagelberg ...

Northvolt aims for 50% recycled content in new cells by 2030

Supported by a full-scale recycling plant at Northvolt Ett, the company is planning to develop new cells with 50% recycled contents by 2030. To be completed in phases, Northvolt's first block will be operational in 2022 and recycle approximately 25,000t of battery cells a ...

Northvolt makes breakthrough in sodium-ion battery technology

Swedish start-up Northvolt announced on Tuesday a breakthrough in its sodium-ion battery technology, developed for use in energy storage systems.. The battery does not involve the use of lithium, cobalt or nickel, and could remove global dependence on China, which dominates critical material supply chains within the energy transition, the company said ...

Northvolt to build Li-ion battery gigafactory in Quebec

Claimed to be the largest private investment in Quebec, Northvolt Six is backed by the Canadian national government and the Quebec provincial government. The 170-hectare site for Northvolt Six at McMasterville and Saint-Basile-le-Grand was chosen following a thorough assessment of North American location options.
