Lithium-ion battery solutions for energy storage , Inventus Power

If the discharge of the battery goes to 70% and beyond, that damages the battery and shortens its life. Deep discharging is another area where Li-ion trumps lead-acid. Lithium-ion can handle discharge depths up to 80% higher or more vs. the 50% of lead-acid. Li-ion has a much higher capacity that can be put to work when it's needed.

Lithium-ion battery storage: Maximizing Lifespan and Performance

Avoid storage voltage for lithium ion battery high temperatures, as it can shorten the battery life and in severe cases can lead to an explosion. If possible, it can be stored in a refrigerator. If the laptop is using AC power, please remove the lithium-ion battery to avoid being affected by the heat generated by the computer. 5.
