Smart Microgrid System Training Tutorial

Overview

What is a smart grid?

Tutorials Tutorials The Smart Grid describes a next-generation electrical power system that is stylified by the increased use of communications and information technology in the generation, delivery, and consumption of electrical energy worldwide. IEEE Smart Grid hosts a series of tutorials on varying aspects of global grid modernization.

What is the Smart Micro Grid Controller project?

The Smart Micro Grid Controller project develops intelligent equipment for microgrids, featuring integrated control and safe operation functions. This project aims to support energy developers and producers in using their investments more efficiently.

How does microgrid work?

The components of Microgrid are interfaced through quick response power electronics and present itself as a single entity and therefore can be connected to traditional power grid or can also be operated in stand-alone mode as a self-sustained power system .

What is the IEEE Academy on smart grid?

At the completion of the IEEE Academy on Smart Grid, the learner will be able to demonstrate their new knowledge and will earn a certificate. The IEEE Academy on Smart Grid will focus on the following technical areas: Microgrids are considered a critical and enabling link in the transition from bulk power systems to smart distributed grids.

What is Microgrid Certification Training?

Microgrid Certification Training is a 3-day course designed for all engineers who want to learn, design, or operate microgrids. It is also suitable for power traders to understand modern microgrid technologies and independent

system operator personnel. The training covers understanding energy management systems (EMS) in microgrids, including centralized or decentralized microgrids.

What is a smart microgrid demonstration system?

The smart microgrid demonstration system features a 100 kW/400 kW h energy storage solution based on three equally sized vanadium flow batteries. It also includes 150 kW of solar PV capacity.
