Solar Generator Company Ranking

Overview

What is the best solar generator?

Were it not for its price, the Bluetti AC200MAX Expandable Power Station would have been a contender for the best solar generator overall. With a 2,048-watt-hour capacity, a 2,200-watt output, and 16 charging ports, this is a serious solar power station that can handle almost anything you'd need a solar generator for.

Are solar generators a good investment?

Solar generators can be a pricey investment. Before you start looking at the various power stations and solar panels and package deals available, it's important to know how much you are willing to spend. Underspending on a power station can result in inadequate power needs in the case of a power outage or while adventuring off grid.

Which solar generator should I buy?

Anker is another leader in the backup power space, and the Anker 757 solar generator is the model I recommend to friends and family who are looking for top value. It impressed our testers with its smart design, solid construction and competitive pricing.

Is a solar generator worth it?

A solar generator may be worth it depending on how you use it. The cost of the generator easily pays for itself if you live somewhere that receives ample sunlight and you utilize the energy from the generator as a home backup. Alternatively, if you frequently go on road trips, a solar generator is also worth it.

Should you buy a solar generator or a power station?

Ideally, you want a solar generator that juices up your electronics quickly, but you also want a power station that can be charged up fairly quickly. This

usually isn't something you have to worry about with modern power stations from top brands like Jackery or EcoFlow. With solar generators, the tightest bottleneck is the solar panels themselves.

What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.
