

## Solar Energy South Africa

# Solar business plan Tunisia

## Overview

---

What is the Tunisian Solar Plan?

The Tunisian Solar Plan aims at developing an additional renewable energy installed capacity of 3815 MW by 2030. The targeted share per technology is detailed in the chart on the right.

Is Tunisia a good place to invest in solar energy?

Tunisia's climate presents a key solar energy opportunity and, together with an improved investment framework and a highly skilled workforce, the country should be well positioned support its ambitious Plan Solaire Tunisien. However, to date, Tunisia has fallen short of its intermediate solar PV targets.

How much money is needed to implement the Tunisian Solar Program?

The total investment required to implement the Tunisian Solar Program plan have been estimated at \$2.5 billion, including \$175 million from the National Fund, \$530 million from the public sector, \$1,660 million from private sector funds, and \$24 million from international cooperation.

What is the energy situation in Tunisia?

The energy situation in Tunisia is marked by limited resources, a decrease in production and a sharp increase in demand. The gap between energy generation and national demand in hydrocarbons has created a deficit in the primary energy balance, which reached 49% in 2018, against 15% in 2010.

Where is the first large scale solar power plant in Tunisia?

The first large scale solar power plant of a 10MW capacity, co-financed by KfW and NIF (Neighbourhood Investment Facility) and implemented by STEG, is in Tozeur. TuNur CSP project is Tunisia's most ambitious renewable energy project yet.

What challenges does the Tunisian energy sector face?

The Tunisian energy sector is facing strategical, economical, social and environmental challenges. Energy sourcing, particularly in the power sector, relies heavily on natural gas (97% of total power generation), of which 50% is imported from neighboring Algeria, given the limited available national resources.
