

## Solar Energy South Africa

# Solar energy storage lights flashing

## Overview

---

### Why is my solar panel flashing at night?

**Damaged Solar Cells** – Cracks or broken solar cells prevent the panel from absorbing sunlight efficiently, leading to flashing. **Malfunctioning Light Sensor** – These sensors tell solar lights when to turn on at night. If faulty, the lights could blink on and off incorrectly.

### How to fix a flashing solar light?

If your solar light is flashing, try moving it to a sunny spot to see if that makes a difference. If the issue persists, bring the light inside for a day or two to give the batteries a chance to charge completely. This may stop the light from flashing. We hope these tips help you get your solar light working properly again.

### Why do solar lights flash?

One of the most common reasons solar lights flash is a low battery. The battery might not hold a charge as efficiently as it should, due to natural degradation over time or manufacturing defects. It's possible you need a new battery for your solar light. Make sure you choose the right type and size.

### Why are my solar lights blinking?

**Old or dying batteries** can cause solar lights to blink or flicker. **Faulty Wiring** – Loose, damaged, or improperly connected wires leading to the solar lights will cause erratic performance like flashing. **Positioning** – If solar panels don't get enough direct sunlight during the day, the lights won't charge properly and may blink at night.

### What problems do solar-powered lights face?

Another common issue that solar-powered lights struggle with from time to time are batteries that are underpowered or not quite as capable of holding a charge from solar juice as you might expect. Battery technology has come a

long way (a real long way) when it comes to solar solutions in the last 20 years.

Why does my solar light keep flickering?

Solar lights automatically turn on at dusk. However, if there's a problem with the light sensor, the lights might flicker or not turn on as expected. Why Does My Solar Light Keep Flashing?

The ambient sensor can be temporarily covered to help you diagnose the problem. Lights should come on when the sensor is covered.
