## **Bought a new house, solar panels are 1000ft**

6 ???· Me and my wife recently purchased our first house and it has a solar array that is about 11kw and has its own solaredge inverter and its own utility meter as it is directly grid tied. The power company just credits us what it produces and we apply it to our house. If you don't change anything to your current solar system and you

add the

## Solar House 1

The difference between Solar House and a Traditional Solar Farm is that Solar House sits on 10 acres and can produce as much or more electricity as a traditional solar farm sitting on 100 acres. On a traditional solar farm, you lose 25 to 35% of electricity during transit, with Solar House you lose less than 5% of power generated.
