# Solar integrated apple light bracket

## Overview

---

### How do smart lights connect to Apple home?

The way smart lights connect to Apple Home will vary based on the manufacturer. Generally, you'll need to either tap your iPhone against the device or manually punch the pairing code into the light's native app once the bulb has power. After the native app is fully set up, you'll need to open the Home app and tap the "Plus" button in the top-right.

### How to control lights with Apple home?

The easiest way to control lights with Apple Home is by using Siri. You can say things like "turn down the living room lights to 50%" or "turn off all the lights" and have it taken care of without having to dig around within the Home app proper. That said, the Apple Home app allows you to organize your lights into rooms.

### Which smart lights support thread through HomeKit?

This way, you can have seamless automation and control of everything in the house. Smart lights, in particular, have great control options through the Home apps for iOS, iPadOS, and macOS, including full Siri support for hands-free commands. Nanoleaf tops our list as one of the few smart lights that support Thread through HomeKit.
