

## Solar Energy South Africa

# Solar panels cost-effectiveness

## Overview

---

How much does a solar panel system cost?

Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. The average domestic solar panel system is 3.5kWp and costs around £7,000.

How much do solar panels cost in the UK?

According to the Energy Saving Trust, the average solar panel system in the UK is 3.5kWp, with an overall average cost of £7,000. That can rise to as much as £9,000 for a 5kWp system if you have a larger home. These figures represent the total cost, including the panels themselves and the installation costs, which can be substantial.

How efficient are solar panels?

Solar panels available today can have efficiencies above 22%. Solar technology has made leaps and bounds toward higher efficiency. Just five years ago, the average solar panel efficiency in quotes through EnergySage was 19%. In 2024, the average efficiency is about 21.4%, which translates to 10% more electricity produced per panel.

Do solar panels cost vs long-term benefits?

Dr Ben Kolosz is an Assistant Professor in Renewable Energy and Carbon Removal at the Energy and Environment Institute, University of Hull. We spoke to him about solar panel costs. "Homeowners should consider the cost versus long-term benefits of installing solar panels by evaluating factors like break-even time and potential savings.

Why do solar panels cost so much?

Solar panel quality significantly impacts their cost. Higher-quality panels,

made with superior materials and advanced technology, offer greater efficiency, longer lifespans, and better warranties. This higher upfront cost is justified by increased energy production and durability, leading to greater long-term savings and reliability.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money?

Solar panels are often marketed as a way to save money on electricity – and sometimes as a way to make money too.
