

Solar Energy South Africa

Solar power generation street light single head

LIQUID/AIR COOLING

ON GRID/HYBRID

PROTECTION IP54/IP55

BATTERY /6000 CYCLES

Overview

Are solar street lights energy independent?

Become energy independent today with Sun-Lite. Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting.

How do solar street lights work?

Our Sun-Lite solar street lights use LED lighting technology with solar panels that absorb enough energy, no matter the season. Each solar panel is made up of multiple photovoltaic cells. The energy generation process starts with these cells converting solar energy from natural sunlight into electrical energy.

Are solar street lights a good choice?

Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting. Also, unlike traditional lighting, LEDs emit almost no heat, making them safer to change and more energy efficient.

What is solar street lighting?

Solar street lighting is an excellent solution for temporary or essential works lighting. Solar lights, using redeployable solutions such as the below concrete blocks, can be installed quickly without the need for a mains connection, providing immediate illumination. This flexibility is beneficial for essential work or emergency repairs.

What is the Richmond solar street light?

The Richmond Solar Street Light is a next generation lighting system with a fully integrated all-in-one solar lighting setup. It is powered by high grade

solar panels and features Philips Luxeon LEDs for high level illumination with significant energy savings.

Is solar street lighting a viable solution in the UK?

Solar street lighting is becoming an increasingly attractive and sought-after solution in the UK.
