What is a control room in a solar power plant?

The control room building in a solar power plant usually consists of different areas, such as the SCADA room, battery room, store room, office cum meeting room, water closets, bathroom cum toilet, pantry, and lobby. Each area has specific requirements that need to be met to ensure the safety and functionality of the plant.

What is a solar power plant SCADA room?

It houses the Supervisory Control and Data Acquisition (SCADA) system, which is responsible for monitoring and controlling the entire solar power plant. The SCADA room should be large enough to accommodate all the necessary equipment, including servers, workstations, and communication equipment.

What is a photovoltaic power station?

A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant power.

How big should a solar power plant control room be?

The MCR room, which is the primary control room, should be at least 150-200 sq.m in size. It's essential to ensure that all areas of the control room building are well-designed and equipped with the necessary amenities to ensure the smooth and efficient operation of the solar power plant.

What is a solar battery room?

Battery Room: The battery room is where the batteries used to store the solar power are housed. The room should be well-ventilated and equipped with a fire suppression system to ensure the safety of the workers and the equipment. It's essential to keep the battery room clean and dry to prevent any damage to the batteries.

How does SCADA work in a solar PV plant?

In a solar PV plant, the SCADA architecture includes: One or more master stations or Master Terminal Units (MTUs), which operators use to monitor the plant and interact with remote devices through a Human Machine Interface (HMI). For a solar plant, this will be a computer in the central monitoring station or control room running the SCADA software.
