Solar power station on board He Sheng

Overview

Who is building a solar power station in Sichuan?

Yalong River Hydropower Development, a state-owned hydropower developer, has started building the 1 GW Kela PV power station in Sichuan province, southwestern China. The solar facility will be connected to the operational 3 GW Lianghekou hydropower station on the Yalong River.

What is the Kela photovoltaic power station?

On July 8, 2022, the Kela Photovoltaic Power Station, the world's largest integrated hydro-solar power station, officially started construction. The Kela station is also the first phase of the hydro-solar complementary project of the Yalong River Lianghekou Hydropower Station.

Which is the world's largest integrated hydro-solar power station?

The Kela Photovoltaic Power Station is the world's largest integrated hydro-solar power station, and the first under-construction integrated hydro-solar power station of the Yalong River Basin Clean Energy Base, one of the country's nine major clean energy bases, in China's 14th Five-Year Plan.

What is China's largest hybrid solar power plant?

China is a global leader in developing renewable energy, and the Kela photovoltaic (PV) power station is adding to the country's energy mix as the world's largest hybrid solar-hydropower plant. The Kela station idea was formed by the Design and Research Institute of Power China Chengdu in 2016.

Will a photovoltaic power station boost consumption of new energy?

Li Sheng, executive vice president of the China Renewable Energy Engineering Institute, said that the hydro-solar complementary development model of the Kela Photovoltaic Power Station will boost consumption of new energy through the complementary functions of hydropower and photovoltaic power stations.

Where is Yalong hydropower building a 1 GW solar park?

Yalong Hydropower is building a 1 GW solar park that will be connected to an operational 3 GW hydropower facility on the Yalong River in southwestern China. Yalong River Hydropower Development, a state-owned hydropower developer, has started building the 1 GW Kela PV power station in Sichuan province, southwestern China.

Solar power station on board He Sheng

The 20 Largest Solar Power Plants in the World

The largest solar power plant in the world is the Bhadla Solar Park, which was completed in 2020. This solar thermal power plant is located in Bhadla in the Jodhpur district of Rajasthan, India. The Bhadla Solar Park is a 2.25GW solar ...

World's largest hydro-solar power station fully ...

The world's largest and highest-altitude hydro-solar power plant, which generates power through a water-light complementary manner, entered full operation in China on Sunday. For the first time, the Kela photovoltaic power ...

TBEA Helps Put into Operation the World's Largest ...

The Kela Phase I PV Power Station situated in the Yalong River basin, the world's largest and highest-altitude hydropower and PV complementary power station went into operation for power generation on June 25, 2023. This ...
