

## Solar Energy South Africa

# Solar rates today South Sudan

## Overview

---

Specifically for South Sudan, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

Specifically for South Sudan, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

'South Sudan receives very high levels of solar irradiation of 5.7 kWh/m<sup>2</sup>/day and a specific yield of 4.5 kWh/kWp/day indicating a very strong technical feasibility for solar in the country.<sup>6</sup> 'Variable Renewable Electricity (VRE) plus-storage projects are in the planning phase in South Sudan including a 20 MW.

Explore South Sudan solar panel manufacturing landscape through detailed market analysis, production statistics, and industry insights. Comprehensive data on capacity, costs, and growth.

EarthSpark supported SunGate Solar, a leading solar installer in South Sudan, to launch the country's first solar-powered community microgrid.

Explore the solar photovoltaic (PV) potential across 3 locations in South Sudan, from Malakal to Juba. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations. Why is solar energy important in South Sudan?

As characterised by ample sunshine with strong solar power potential, South Sudan remains as one of key destinations on African continent for solar energy investment. In addition to this, it has been documented that evolution of solar PV is of great significance in South Sudan.

How long does solar energy last in South Sudan?

Proponents of solar energy argue that a solar system can produce reliable electricity for about 25 years. Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy poverty and economic diversification.

Which solar energy options are available in Sudan?

In Sudan, three solar energy options are available: 1. Solar PV energy: 1000 MW (on- and off-grid) will be applicable in different states within Sudan. 2. Solar CSP technology: 100 MW (grid connected) will be applicable, especially in the northern part of Sudan. 3. Waste to Energy: 80 MW (grid connected) will be applicable in several intended sites.

How solar energy can transform South Sudan's economy?

A solar energy can also be transformative to South Sudan's economy. For example, solar energy is affordable, cleaner and last longer as compared to energy from diesel-powered generators because generators need diesel to burn and they also need to be replaced after few years.

How much solar radiation does Sudan have?

Sudan possesses an average annual radiation range of 436 to 639 W/m<sup>2</sup> per year, which exceeds the annual global average. The period of solar radiation in the country is between 8.5 and 11 hours per day . There is, furthermore, much unused land available for RE development .

How much electricity does South Sudan produce per year?

of electric energy per year. Per capita this is an average of 49 kWh. South Sudan can completely be self-sufficient with domestically produced energy. The total production of all electric energy producing facilities is 558 m kWh, also 105 percent of own requirements.
