Solar roof price Finland

Overview

The average price for a high-quality solar electricity system is 7,000–10,000 euros and it is eligible for household deduction. If the system produces surplus electricity, you can sell it.

The average price for a high-quality solar electricity system is 7,000–10,000 euros and it is eligible for household deduction. If the system produces surplus electricity, you can sell it.

Solar power pays off in Finland and the Baltic countries, as despite our Nordic location our production potential is comparable to that of Central European countries. Although the amount of light varies with the seasons, solar power solutions in Finland produce energy well from March to September.

Solar power generation forecasts are based on weather forecasts, estimation of the total installed solar panel capacity and the estimated locations of the panels in Finland. Fingrid has estimated the installed capacity by using installation statistics published annually by Finnish Energy Authority's that it receives from the distribution system .

Get solar panels for your roof easily. Request a quote via our website. Our experts carry out the mapping, planning and measurements related to the purchase of solar panels for your home. You may need a building or planning permit to install solar panels. We install the solar panels in one working day. You will receive guidance on using the system.

Solar panels are suitable for the roofs of detached homes regardless of the type of roof. Our system components have been selected especially for Finnish conditions, with specific mounting systems for different roof types.

Solar roof price Finland

Just got quoted \$156k for a 9.75kW Tesla solar roof. Is this

We got a quote for an asphalt shingle roof, because we need a new one, and it was just under \$40,000 to replace the roof. The first quote for a solar roof (9.75kW) just came in at \$156,000 or more that \$19/watt!? It will only offset 12% of our annual energy usage based on estimates. :-/ Feeling pretty discouraged at the moment.

[SOLAR FLAT-5XL ceramic roof tile](#)

SOLAR FLAT-5XL ceramic roof tiles are the only large ceramic tiles with an integrated solar energy system. They are ideal for providing a reliable supply of solar energy. Thanks to the integration of the solar panel into the tile, the tiles provide all the benefits of a roof made from ceramic tiles in terms of watertightness, without any risk of deterioration or oxidation.
