Unpacking battery energy storage value chain opportunities

A study conducted by Mintek revealed that there is currently no viable business case for lithium-ion battery recycling in South Africa. One of the key issues highlighted is that there are low collection rates by recyclers. The study posits that if potential recyclers could achieve a collection rate of 500 tons per year, then it would be viable

Mintek celebrates 90 years of innovation

To herald this significant milestone, Mintek unveils the Mintek@90 Conference, a tribute to 90 years of excellence in minerals innovation. This event is scheduled to take place from 11-12 November 2024 at the esteemed Sandton Convention Centre.. The Mintek@90 Conference provides a distinctive platform for industry leaders, experts, and enthusiasts to ...

South Africa has impressively low battery manganese incentive ...

South Africa's current process of dissolving the world's purest manganese metal to make battery grade manganese has got the lowest incentive price of any of the new, non-Chinese high-purity manganese sulphate monohydrate suppliers, or future suppliers, the Mintek@90 conference heard on Monday. South Africa makes money at
