Tailan new energy Hungary

Overview

What is Tailan Tailan New Energy?

Tailan Tailan New Energy, a Chinese company developing solid-state lithium battery technology, has disclosed significant advancements in its latest prototype cell. In its most recent announcement, the researchers point to an extremely high energy density, aiming to deliver a 2,000-kilometer range for BEVs on a single charge.

Does Tailan New Energy have a solid-state battery cell?

Based on its specs, Tailan New Energy states its solid-state battery cell sets industry records in both energy density and storage capacity.

Is Tailan a prototype battery?

Tailan's solid state cells are prototypes, but mass-production is scheduled for 2025. /Tailan Tailan New Energy, a Chinese company developing solid-state lithium battery technology, has disclosed significant advancements in its latest prototype cell.

How far can a Tailan EV go on a single charge?

Tailan's advancements suggest the potential to significantly extend the driving range of EVs, propelling them to 2,000 kilometers on a single charge. You could reach Sevilla from Brussels on a single charge. The firm asserts that its all-solid-state battery cells meet vehicle-grade standards but hasn't disclosed any tie-up with an automaker.

Could Tailan New Energy reshape the mobility landscape?

Those 360 Wh/kg WeLion cells are expected to propel NIO EVs over 1,000km (620 miles) on a single charge later this year, so the potential of Tailan New Energy's technology to double that density in a similarly sized architectural footprint could reshape the mobility landscape.

What are Tailan's breakthroughs?

According to Tailan, those breakthroughs pertain specifically to ultra-thin and dense composite oxide solid electrolytes, high-capacity advanced positive and negative electrode materials, and an integrated molding process that culminates into an impressive 120 Ah solid-state lithium metal cell.

Taking this successful signing as an opportunity, Tailan New Energy will join hands with Huainan and Shouxian to build a technological lithium battery industry system, support talent training and technological innovation in ...

World's First Automotive-Grade 720Wh/kg Solid-State

Battery by Tailan

Tailan New Energy recently announced a significant breakthrough with the development of world's first automotive-grade solid-state lithium batteries. They claim to have developed the world's first automotive-grade single-cell with a capacity of 120Ah and a tested energy density of 720Wh/kg, setting new industry records for single-cell

[Tailan New Energy and Changan Automobile Hold Solid-State ...

In terms of production costs, Tailan New Energy anticipates a reduction of over 10% in raw material costs with the separator-free technology. According to the plan, Tailan New Energy's separator-free semi-solid power batteries will enter sample pack development for mass production in 2025, followed by vehicle loading verification in 2026.
