Thailand enoda prime exchanger

Overview

What is Enoda Prime exchanger?

The Enoda PRIME® Exchanger: a bidirectional, active power flow device, which delivers a clean electrical signal by dynamically modulating voltage, frequency, phase, power factor and noise removal. Enoda Prime Exchanger is a bidirectional, active power flow device, which delivers a clean electrical signal by dynamically modulating voltage, frequency, phase, power factor and noise removal.

How are Enoda Prime ® exchanger fleets co-ordinated?

Enoda PRIME ® Exchanger fleets are co-ordinated through Enoda ENSEMBLE™ - our transactive software platform for Enoda PRIME ® and other smart technologies. Enoda ENSEMBLE™ can create an intelligent energy system which balances power across the grid, co-ordinating variable demand and supply where needed, and providing low-carbon balancing services.

What is Enoda Prime® Technology?

Enoda PRIME® technology is unique, enabling bidirectional energy flow, delivering a huge leap in grid capacity, resilience, and stability. ENODA innovates in close relationship to the fundamental principles of physics, delivering a quantum shift in the control of electromagnetic force in energy systems.

Where is Enoda based?

Enoda was founded in 2021 and is headquartered in Edinburgh, UK. In this edition of Power Women, a Q&A series highlighting women across the value chain in the energy sector, Kamogelo Motse talks to Anna Bazley.

Does Enoda care about the future of the grid?

Enoda is responding to this call for evidence as we care deeply about the future of the grid. Enoda recognises that the grid is key to achieving the energy transition and net zero targets, and therefore is heavily invested in achieving the right policy and regulatory environment to allow a secure, stable grid that enables the decarbonisation of the energy system.

[ENODA news and insight -- ENODA](#)

Introduction of Enoda PRIME® Exchanger: the integration of optimal passive design with complex dynamic control ENODA provides a system which is agnostic to the nature of supply and demand. To do that though, there needs to be one fundamental enabling technology.

[Contact Enoda -- ENODA](#)

ENODA was founded to revolutionise electricity distribution technology, with the ultimate goal of enabling communities to prosper on 100% renewable energy. ENODA is delivering technology for at scale decarbonisation of industrial ...

Enoda

The Enoda PRIME® Exchanger is a backwards compatible replacement for multiple power-flow technologies in electrical substations, slotting into existing infrastructure and actively correcting power flow. ENODA's platform for energy can help remove constraints to decarbonisation and address the soaring cost of system balancing.

Enoda PRIME® Exchanger Technical Animation

The Enoda PRIME® Exchanger: a bidirectional, active power flow device, which delivers a clean

electrical signal by dynamically modulating voltage, frequency, phase, power factor and noise removal. Enoda PRIME® Exchangers can increase renewables penetration supported by the grid from ~30% to +80%.
