# The solar panel is cracked in the middle

## Overview

---

Spotting a crack on your solar panel might send you into a spiral if you just purchased them. Fortunately, most cracks won't impede your panel's performance. A more severe crack could reduce.

First, take a close look at the affected area. You are spotting what looks like a crack on your solar panel doesn't mean much if you saw it while standing on the curb. Get close to the panels, and take some close-up photos of.

When purchasing your panels, pay close attention to where you'd like to place them. Anything above your panels might pose a potential risk. Imagine there is a tree with branches hanging above.
