### Inequality of opportunity in access to and consumption of modern energy ...

The transformation towards cleaner energy consumption in Togo is progressing at a slow pace due to a combination of unfavourable socioeconomic, demographic, and spatial factors that favour traditional fuel use over clean and efficient energy. This study tries to quantify the inequality in modern energy access by applying the inequality of opportunity ...

## Energy & Industrials

Clayton Wilkerson, chief of staff for Deloitte Services LP's Research Center for Energy and Industrials, is a dynamic industry development leader with over 20 years experience, boasting a proven track record reflected in my expertise, skills and accomplishments in leading-edge, research and insights, learning and development, talent acquisition, and training implementation.

## Togo

It also includes non-energy uses of energy products, such as fossil fuels used to make chemicals. Some of the energy found in primary sources is lost when converting them to useable final products, especially electricity. As a result, the breakdown of final consumption can look very different from that of the primary energy supply (TES).

## Togo

Togo has achieved real success, with the rapidly developing industrial zone Adetikiopé Industrial Platform (PIA). Lomé Port Authority, Togo Water, and the Togolese Electric Energy Company (CEET) hold monopolies in their sectors. while increasing the share of renewables to 50% by ambitiously rolling out new power plants and off-grid

The country's main source of energy is biomass. About 76% comes from firewood, charcoal and vegetable waste. Petroleum products account for just over a quarter of energy needs, while electricity

## Power Africa in Togo

Power Africa recently worked with the Government of Togo to make grid connections more affordable for all. Togolese households saw a 100-fold DECREASE in upfront electricity connection costs, paying 1,000 CFA (\$1.60) instead of 104,000 CFA (\$167.00), following Power Africa's support to Togo's Ministry of

Energy to launch Fonds Tinga.

## Togo to Halve Customs Duties on Industrial Diesel in 2025

(Togo First) - In Togo, customs duties on industrial diesel will be halved next year. The change was outlined in the 2025 draft finance law, which Lomé approved last week. The amendment will take effect on January 1. It will apply to diesel that fuels the machinery and non-road mobile equipment used by extractive and manufacturing companies.

## Togo , AFREC

The total primary energy supply was 3,295 ktoe according to AFREC's energy balance 2020. In Togo, biomass energy comprises charcoal, wood and agricultural waste. Traditional biomass is the most prominent source of energy for cooking and heating purposes in Togo. About 87% of all biomass is used in the households (mainly in rural areas) utilize wood energy.
