

Solar Energy South Africa

Tonga 3kw solar system kit

Overview

How much power does a 3KW Solar System produce?

Our 3 kW solar systems feature DIY solar kits, which will produce at least 3kW (or 3,000 watts) of power. This translates to approximately 200 to 750 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Choose from a selection of 3kW solar kits with string inverters, microinverters and ground mount options.

What makes a 3KW solar kit a hybrid system?

A 3kw solar kit is considered a hybrid system because it requires a special type of inverter - a hybrid inverter. Hybrid inverters support energy storage and some models even have a built-in battery and a controller for it. This setup ensures uninterrupted power supply: whenever a power outage happens in the grid, the inverter switches your house to battery support.

How much space does a 3KW Solar System need?

A 3kW solar kit from GoGreenSolar requires about 184 square feet of space. Solar panels with string converters need to be grouped together and facing the same direction. You'll want to consider whether this option is the right choice for you or if you'd be best served by solar panels with microinverters.

Can a 3KW Solar System power a house?

A 3kw solar system can be paired with a battery to power a house in a remote location where there are no power lines. You would prefer to have an energy bank of such a capacity that would give you a complete energy autonomy for 1-2 days when using a 3kw solar system to power a house.

Is a battery required for a 3KW Solar System?

A 3kw solar system for off-grid use always requires batteries — and batteries are expensive in general. You need an energy storage for night consumption and for days when panels don't produce enough. Batteries are a necessary

component for a 3KW solar system.

Is a 3 kW solar system sufficient?

A 3 kW solar system is more than enough for any mobile installation, such as an RV or a boat system. It can also substantially lower the dependence of your house on commercial electricity.
