Transporting the longest wind turbine blades

Overview

What is the largest wind turbine blade in the world?

We introduced the LM 88.4 p in 2016 as the longest, most advanced, wind turbine blade in the world. Today, blades are growing in size at a rapid pace, including our largest blade to date, the LM 107.0 p, which builds on our experience and knowledge gained from past record-breakers.

How did Mammoet Transport the world's longest wind turbine blade?

Mammoet transported the world's longest wind turbine blade from LM Wind Power's pilot plant in Lunderskov to the Blaest Test Center in Aalborg. Being the longest blade in the world, no transport equipment has been previously planned for such scale, so LM Wind Power needed a specialist transport company to carry out this unique operation.

Who makes the best wind turbine blades?

Fast-forward 40 years, the Lunderskov Pilot Plant continues to manufacture the longest and most advanced blades in the world, and LM Wind Power is the world's leading independent blade supplier, with factories in all major wind markets. Quite a journey, for both the company and its record-breaking blade!.

How long should a wind turbine blade be?

As larger-scale blades and bigger turbines are developed—beyond 80 ft in length ranging up to 145 ft—utilizing trucks or helicopters to transport these blades in austere or landlocked territories becomes complex. Blade lengths will continue to grow in the future, particularly for offshore wind projects.

Could a big adaptive rotor transport massive wind turbine blades?

Under the WETO-funded Big Adaptive Rotor Project, DOE national laboratory researchers have determined a way to transport massive wind turbine blades to parts of the country at a lower cost.

What are ultra-long wind turbine blades?

Ultra-long wind turbine blades are a product of game-changing talent, teamwork and technology. Alongside our suppliers and customers, LM Wind Power is living our vision – Together, we capture the wind to power a cleaner world.

Transporting the longest wind turbine blades

[Gone with the wind: turbine transport](#)

This includes: its FTV 300 rotor blade transport device for the transportation of rotor blades; its Super Lift fourfold extendable flatbed semitrailer for transporting long rotor blades; its RA4 tower adapter for transporting heavy ...

Wind Turbine Transportation , Oversize Wind Blade, Tower and ...

But, sustained strong winds are less important with larger wind turbines--larger turbines with longer blades, that reach higher, can be just as effective with lighter winds. And that is the crux ...

Large Wind Turbine Blade Transportation Solution: The ...

The largest blades are over 200 feet long (60 meters-plus) for a 5MW turbine. In this situation, the Aeroscraft with its vertical takeoff and landing capability offers a solution to transporting blades from a manufacturing site ...

Longest turbine blade transport , Mammoet news

Mammoet Wind successfully completes the transport of the longest blade in the world. The

blade measures 88.4 meters in length, with a height of 4.47 meters when loaded on the truck. Precise planning was essential to this operation as ...

Collett & Sons makes light work of wind turbine ...

This milestone project saw Collett and Sons deliver nine nacelles, nine hubs, nine power trains, 36 tower sections and 27 blades, which included the 80-metre long blades - the longest onshore turbine blades ever delivered in the ...

Logistical Triumph: Transporting the World's Longest Wind Turbine Blade

It is a feat of engineering and logistical prowess: Mammoet Wind has just completed the transport of the world's longest wind turbine blade, an act that underpins the complexity and precision of
