Tribes install solar power

Overview

Are tribes interested in solar?

Many Tribes are actively seeking to engage in solar development; a review of 35 Tribal strategic energy plans in 2019 revealed that 32 of 35 Tribes were exploring solar options for their communities. Tribes may also consider adding energy storage systems to complement their solar installations.

How can a tribe develop a solar project?

Community energy education may be an important piece of goal development. Another early step the Tribe can take is discussing potential projects with its utility. The utility will likely be a key partner for a solar project, so communication early and often can help a project be more successful.

Can a tribe get a solar energy subsidy?

It's an attractive option for tribes who historically have had little access to reliable energy. Thanks to the Inflation Reduction Act of 2022, the tribe can get tax subsidies of up to 30% for solar and wind farms, as well as grant programmes for electrification, climate resiliency and energy generation.

Can solar power bring jobs to Native American tribes?

Organisations across the US are training Native American tribes how to install solar panels in a bid to bring jobs and power to reservations (Credit: Indigenized Energy) Renewable energy technologies provide opportunities for tribes to diversify, become energy independent, and create new revenue streams.

How much solar power does tribal land have?

Tribal land in the United States represents approximately 2% of the country's total landmass and yet it has more than 5% of solar PV potential, according to a 2013 report from the National Renewable Energy Laboratory (NREL).

Can tribal members benefit from rooftop solar?

Whether a Tribal member owns a house with sufficient capacity to manage distributed generation or a Tribal member lives in a community that operates a small isolated microgrid where rooftop solar isn't feasible, all Tribal residents of Alaska will have the opportunity to benefit from this program.

Tribes install solar power

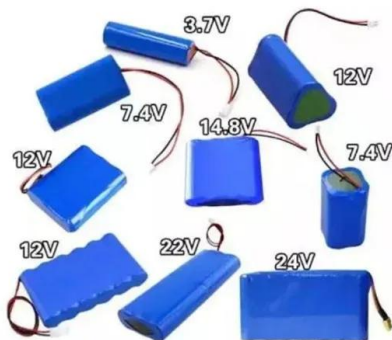

Local Government Guide for Solar Deployment
