

Solar Energy South Africa

Tuvalu sable energy

Overview

Renewable energy in Tuvalu is a growing sector of the country's energy supply. Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy resources due to its tropical location. It is somewhat complicated because Tuvalu consists of nin.

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The.

In 2014 the Tuvalu Electricity Corporation (TEC) began implementing a Master Plan for Renewable Energy and Energy Efficiency (MPREEE) through the Tuvalu Energy Sector Development Project (ESDP), which b.

The led by made a commitment under the , which was signed on 5 September 2013, to implement power generation of 100% renewable energy (between 2013 a.

What is the main source of energy in Tuvalu?

The primary energy consumption represents the upstream supply. The only national energy source is biomass (18% of total consumption). Photovoltaic and thermal solar contribute for less than 1%. The balance of supply is oil (Fig. 2). Tuvalu is close to being a totally oil dependent economy.

Should energy data be consolidated in Tuvalu?

One of the study's recommendations is the consolidation of all energy data, to build an energy balance and to include it in the annual economy report. Since Tuvalu's electricity generation efficiency is low, around 35%, the significance of the electricity sector is higher in the primary energy balance than in final end-use consumption.

How much energy is wasted in Tuvalu?

Only 3,232 toe (71%) of primary energy supply reached an end-use category. 1,341 toe (29% of primary energy supply) was wasted, mainly due to low electricity generation efficiency. Tuvalu's electricity consumption is increasing

rapidly at a 3.8% yearly average rate over the last ten years. It reached 4,121 MWh in 2004.

Why does Tuvalu use a lot of electricity?

A large proportion of Tuvalu's electricity consumption is a function of the energy efficiency of imported products. It is in the nation's economic interest to set up minimum performance levels for imported household and professional equipment: lighting, cooling, cooking, washing, television sets and other electronics equipment.

What is the balance of supply in Tuvalu?

The balance of supply is oil (Fig. 2). Tuvalu is close to being a totally oil dependent economy. In 2004 the total energy consumption was 4.6 ktoe, oil accounting for 3.8 ktoe (82%) and biomass for 0.8 ktoe (almost 18% of the total primary energy consumption).

Why should Tuvalu invest in wind energy?

Development of wind energy offers another opportunity to Tuvalu: to tackle the important issue of water supply. When the supply of electricity exceeds the demand, the additional capacity can be used for water desalinization or water purification.

State files waiver that could help restart Refugio Oil Spill pipeline

3 ????· The state Fire Marshal has signed off on a waiver that was a key hurdle in reopening the pipeline involved in the Refugio Oil Spill nine years ago. The waiver would allow Sable to bypass federal regulations on "cathodic

protection," which is supposed to prevent pipeline corrosion. Environmental groups and some local politicians are criticizing the decision.
