Will there be a size limit for solar projects in Turkey?

The government has not yet disclosed whether there will be a size limit for PV installations eligible for the incentive scheme. Turkey has previously supported large-scale solar projects via a YEKA PV tender scheme and an incentive program for unlicensed PV plants under 1 MW.

How much does a Turkish Solar System cost?

The Turkish authorities have set a 10-year feed-in tariff (FIT) of TRY 1.06 (\$0.0545)/kWh for PV systems that are installed between July 1, 2021, and December 31, 2030. Solar projects with Turkish PV components will be given an additional five-year tariff of TRY 0.2880/kWh.

Is the Turkish PV market dominated by self-consumption & net metering?

However, the Turkish PV market is currently being driven by self-consumption and net-metered rooftop PV. Since net metering was introduced in May 2020, the market has started to shift away from megawatt-sized projects, which have traditionally dominated.

Does Turkey have a solar market?

Turkey has previously supported large-scale solar projects via a YEKA PV tender scheme and an incentive program for unlicensed PV plants under 1 MW. However, the Turkish PV market is currently being driven by self-consumption and net-metered rooftop PV.

How many GW of new PV capacity will EMRA allocate by 2030?

According to Eren Engur, a board member for Turkish PV association Günder, the Turkish energy authority, EMRA, hopes to allocate around 20 GW of new PV capacity by 2030 through this scheme. The government has not yet disclosed whether there will be a size limit for PV installations eligible for the incentive scheme.
