## Overview

---

Why are people installing solar power systems and batteries in Ukraine?

The war in Ukraine and its associated energy crunch has pushed the civilians in record numbers to install solar power systems and batteries. Due to the ongoing crisis, there is ample news about the energy crises in several parts of the country.

Can solar power save lives in Ukraine?

The only energy source was home solar power, which helped sustain life and save many lives. New small-capacity solar power plants are being developed in Ukraine to avoid blackouts, helping businesses stay afloat amid dire economic conditions. Our energy future must include a healthy mixture of solar farms, community solar, and rooftop solar.

How much solar power will Ukraine have by 2027?

The results show that 9.2 GW of solar generation capacity can be integrated into the Ukrainian electricity system by 2027 and up to 14 GW by 2030. This represents an increase of 8.4 GW compared to current capacity and will require an investment of almost €5 billion.

Where are home solar power plants located in Ukraine?

Most of the facilities are located in the southern and central parts of Ukraine, in the Dnipropetrovsk, Zaporizhia, Mykolaiv, Kherson, and Odesa regions, which today are at the epicenter of heavy fighting and shelling. But one crucial fact is that home solar power plants are the basis of energy security in war conditions.

What is the optimal share of solar power in Ukraine?

Based on techno-economic modelling, we have determined the optimal share of solar power for the period 2027-30. The results show that 9.2 GW of solar generation capacity can be integrated into the Ukrainian electricity system by

2027 and up to 14 GW by 2030.

Does Ukraine have solar power?

In the years leading up to the start of the Russian war of aggression, the share of solar power in Ukraine's total electricity generation capacity had already increased significantly – from 5.9 GW in 2018 to 8.06 GW in 2022 – an increase in solar generation capacity of almost 37%.
