Overview

Will enertrag create a green hydrogen hub in Uruguay?

In the Uruguayan department of Tacuarembó, the German renewable energy firm Enertrag will create a green hydrogen production project named Tambor Green Hydrogen Hub in conjunction with SEG Engineering.

Who is SEG Ingeniera?

SEG Ingeniería is the first energy cost-reduction consultancy firm in the country. As leader in the field of energy efficiency and cost optimization in the region since 1996, our company's main purpose is to analyze, plan, consult and implement systems aimed at a better use of resources.

Can Uruguay produce green hydrogen?

For the production of green hydrogen and its derivatives, the project will include wind and solar plants, as well as an electrolyzer and conversion facilities. Uruguay is one of the world's pioneering countries in the field of renewable energy, with intentions to export green hydrogen and its derivatives in the near future.

Is Uruguay a good partner for Europe?

With its high-quality energy resources, stable political and regulatory framework, and extensive experience in enabling and implementing large-scale renewable energy installations, Uruguay is an ideal partner for Europe and us," says Aram Sander, head of Enertrag's Department of International PtX Project Development.

Octubre 2024. Etiquetado de eficiencia energética de vehículos en Uruguay

Desde fines de septiembre, quienes vayan a comprar un vehículo nuevo en Uruguay encontrarán una novedad: todos los vehículos livianos ahora cuentan con una etiqueta energética, visible en las concesionarias del país. Este etiquetado obligatorio marca un hito en los esfuerzos de Uruguay por mejorar su eficiencia energética y reducir su impacto ambiental.

[Uruguay, leader in renewable energies](#)

Uruguay is at the forefront of energy policy in Latin America and the world and its successful model has been emulated by several other countries. The keys to achieving these milestones have been the country's natural conditions, political will, a modern and effective regulatory framework, and the implementation of a public-private partnership
