Overview

Who is Vida energy?

Vida Energy is one of Sweden's largest biofuel players and leads the Group's efforts in the bio-energy market. We take advantage of the by-products that result from felling and processing in the sawmills by converting these into renewable energy in the form of energy-efficient products such as whole tree chips, stemwood chips and pellets.

Where does Vida energy produce pellets?

Other production is sold to thermal power stations while sawmill chips are sold to the external pulp and paper industry. Vida Energy is also one of Sweden's largest suppliers of top-quality pellets. It has an annual production of approximately 65,000 tonnes, and Vida Energy supplies pellets to a large part of southern Sweden.

Where are Vida wood products made?

Production is mainly focused on structural timber for a number of different markets. 88 percent of Vida's sawn wood products are exported to Europe, the USA, Australia, Africa and Asia. The business also includes packaging manufacturing, bedding and pellet manufacturing, biofuel trading and house manufacturing.

What is Vida stable bedding?

Vida Stable Bedding manufactures bedding for horses, the popular product is made from 100% wood shavings that is optimal for hygiene and cleanliness in stables. Vida Energy has a goal to be a leader in renewable fuel and to create a long-term business that contributes positively to a greener society.
