### Bankable and insurable energy storage: a necessary next step

...

The rapid acceleration in energy storage deployment expected over the coming years will require innovation in the quality and safety standards underpinning new battery and associated technologies. VDE's Jan Geder looks at the technical work underway to ensure the coming storage boom has firm bankability and insurability foundations, in a

### Global energy storage market to experience 23% CAGR until 2030 ...

BNEF's Energy Storage Market Outlook series unveiled that 2022 was the global energy storage's record addition. However, the growth is expected to continue in the following years. BNEF is forecasting a 23% compound annual growth rate until 2030, with ...

### Batteries as an infrastructure asset class: A new paradigm

Battery storage is flexible, remarkable -- and investable -- but you need to know what you're doing and know where the market opportunities and limits lie. Renewable and clean energy financier Laurent Segalen from Megawatt-X explains some of the things he's seen as batteries have become an infrastructure asset in their own right.

## Booming battery storage pipeline heralds renewables ...

Just a few years ago, grid-scale battery storage was widely deemed too expensive to ever be rolled out at significant scale. However, the price of electrochemical battery storage has plummeted, from \$1,200 per ...

## Distributed Archives

A total 3.8GW/9.9GWh of energy storage was deployed in the US in the third quarter of 2024, according to Wood Mackenzie's US Energy Storage Monitor. Premium 'Equal to or better than lithium': Invinity aims vanadium flow batteries at large-scale storage market.

## 'Big expansion' in battery manufacturing

BloombergNEF (BNEF) table of energy transition investments up to and including 2023. Image: BNEF. Energy-Storage.news' publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 20-21 February 2024. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers

## Utilities take heed: behind-the-meter storage to be front runner ...

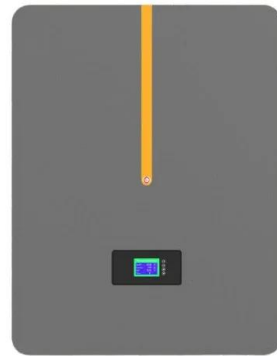

Behind-the-meter storage is forecast to become a larger segment than grid-scale storage by 2021, and could pose a potential threat to utilities, according to Bloomberg Energy Finance

(BNEF) senior analyst Logan Goldie-Scot.

## BW ESS strengthens its position by merging Penso Power into its ...

Transaction is a natural next step following a strategic investment and development partnership established in 2021. 9th October 2024, ZURICH/ LONDON -- BW ESS, a global energy storage owner-operator has reached an agreement to acquire all remaining shares not already owned in Penso Power. BW ESS was already the largest shareholder in ...

## California: 'Energy storage revolution is here,' says governor

BNEF forecasts 40GW/150GWh of California storage by 2030. Market research and analysis group Wood Mackenzie noted in a recent edition of its US Energy Storage Monitor quarterly report that California leads the US for energy storage installs by both power output (megawatts) and energy storage capacity (megawatt-hours).

## Transition Metals Outlook 2024 , BloombergNEF

The Transition Metals Outlook is BNEF's annual

long-term outlook for the role of metals in the energy transition. It empirically determines how the shift to a low-carbon economy will drive demand for metals and answers the question of whether there will be enough supply to meet demand. Clean power (e.g.: solar, wind, storage

**INTEGRATED DESIGN**  
 EASY TO TRANSPORT AND INSTALL,  
 FLEXIBLE DEPLOYMENT

## BloombergNEF: Energy storage investment levels ...

BNEF's report showed that energy storage investment was driven by growth in Asia Pacific and American markets, while EMEA funding slowed down. Image: BNEF Despite the fall in unit prices for energy storage, a ...

## Growth in production will keep lithium carbonate

Energy-Storage.news' publisher Solar Media will host the 2nd Energy Storage Summit Asia, 9-10 July 2024 in Singapore. The event will help give clarity on this nascent, yet quickly growing market, bringing together a community of credible independent generators, policymakers, banks, funds, off-takers and technology providers.

## Booming battery storage pipeline heralds renewables era

Just a few years ago, grid-scale battery storage was widely deemed too expensive to ever be rolled out at significant scale. However, the price of electrochemical battery storage has

plummeted, from \$1,200 per kilowatt-hour (kWh) of lithium-ion (Li-ion) battery storage in 2010 to \$151 in 2022, according to research company BloombergNEF (BNEF). [Keep up ...

## New Energy Outlook 2024 , BloombergNEF , Bloomberg Finance LP

According to the International Energy Agency (IEA) and BloombergNEF, battery storage was the most invested-in energy technology in 2023 with the biggest-ever annual growth in deployments recorded. The ...

## BloombergNEF: 'Already cheaper to install new

In particular, the original discussion of subsidies is not relevant to cost-competitiveness on a technology or deployment volume basis as assessed by the BNEF team, while it should be noted that open cycle gas turbines (OCGT) commonly provide peaking power, combined cycle gas turbines (CCGT) as originally stated, provide baseload energy.

## Sunwoda Energy secures a spot on the BNEF Energy Storage Tier ...

Comprehensive energy storage solutions provider Sunwoda Energy has secured a position on the Bloomberg New Energy Finance (BNEF)

Energy Storage Tier 1 List for the fourth quarter of 2024. The BNEF Tier 1 list is globally recognised for its credible industry research and stringent criteria, which include innovation, market impact, financial

### [Industry Updates Archive](#)

While the global energy storage market is rapidly adopting 300Ah+ battery cells, primarily based on 314Ah, research into and mass production of the next-generation 500Ah+ large-capacity battery cells is already in full swing. Sungrow strengthens Australian market presence with 1.7GWh of C& I energy storage partnerships.

## **New Energy Outlook Series , BloombergNEF , Bloomberg Finance LP**

BNEF New Energy Outlook gives a long-term scenario analysis on the future of the energy economy. These sector and regional reports go into even more detail. wind and electric vehicles as well as the development of new technologies such as clean hydrogen and carbon capture and storage to decarbonize the country's economy.

## **Future hydrogen economy needs investments: BNEF report**

BNEF researchers say that to have the same level of energy security as gas, global storage capacity for hydrogen should be three to four

times the current level, which would cost \$637bn by 2050. Storage options include salt caverns - too geographically limited to be a viable option - pressurised containers and ammonia.

## Investors

According to BloombergNEF (BNEF), energy storage installations worldwide are forecasted to total 358 GW/1,028 GWh by the end of 2030, more than 20 times greater than the 17 GW/34 GWh online at the end of last year. BNEF's forecast suggests that the majority--55 percent--of energy storage built by 2030 will be for energy shifting
