Which roofs can be used for photovoltaic panels

Overview

Which roof is best for solar panels?

No one type of roof is best for solar panels – mounting solutions exist for just about every roof out there. Some roofs will cost more to mount solar panels on. This is due to the different equipment installers need to use. Start comparing customized solar quotes today on the EnergySage Marketplace.

Can solar panels be installed on all roof materials?

While solar panels can usually be safely and effectively installed on all roof materials, the exact installation processes may differ. As such, there is no "best" roof for solar – panels can go on just about any roof material. Below, we'll look at the various roof materials and how installers secure solar panels to each.

Which roof orientation is best for solar panels?

The diagram above indicates how different roof orientations can impact how suitable your roof is for solar panels. The best type of roof for solar panels is a south-facing roof as they tend to generate the most electricity from solar panels, as they are exposed to the sun's energy when it's most intense (midday) and for the longest period.

What is the best roof pitch for solar panels?

What's the best roof pitch for solar panels?

The best roof pitch for solar panels is between 30-40°, but the angle of the roof can fall outside of this range and generate electricity effectively. Solar panels can still absorb sunlight even when horizontal.

Can a wooden roof be used for solar panels?

Wooden roof types can include shingles at an angle or may be completely flat, so the specifics will be dependent on the way the roof is structured. In any

case, a wooden roof is not viable for solar panels because of fire safety concerns. Therefore, wood is not the best material for solar panels.

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.
