

Solar Energy South Africa

Willis energy systems French Polynesia

Overview

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

Is biomass a source of electricity in French Polynesia?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. French Polynesia: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

Product Model
 HJ-ESS-215A(100KW/215KWh)
 HJ-ESS-115A(50KW/115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled

Energy performance assessment of Sea Water Air

To put this in terms of carbon emissions avoided, conventional unitary split systems running in similar hotels on neighboring islands in French Polynesia (COP around 3.5) emit some 860 Tons/year compared to the estimated 225 Tons/year emitted (approximated with the emissions factor of French Polynesia in 2019) operating the Tetiaroa SWAC.

Emission intensity of electricity supplied from grid. Retrieved from the file Base Carbone v23.3 published by ADEME. For detailed guidance on the application and interpretation of these emission factors please refer to the documentation provided by the source.

French Polynesia - Food Systems Dashboard

Countries with lower shares of dietary energy from staple foods may have higher nutritional quality in their food supplies. We've identified the following policies and actions that might address issues with the food system of French Polynesia. Action. Deliver agricultural extension programmes, infrastructure and education to support

Investigating Wind Energy Potential in Tahiti, French Polynesia

In order to achieve France's goal of carbon neutrality by 2050, the French Polynesian administration has set the objective of producing 100% of the local electricity requirements from renewable energy resources. To this end, we present the wind characteristics at six selected locations in Tahiti. Surface wind observations from 2008 to 2020 obtained from ...

Energy performance assessment of Sea Water Air Conditioning ...

One reason for this failure to scale might be the absence of experimental data detailing energy performance of SWAC systems in real-world, commercial settings. Here is presented the performance of an existing 2.4 MW SWAC system, operated by The Brando resort on the atoll of Tetiaroa in French Polynesia.

The Brando In French Polynesia , Stewardship , Sustainable Resort

Inaugurated in 2014, the Sea Water Air Conditioning (SWAC) system taps into the ocean's depths to cool the resort's structures with minimal energy consumption. Ocean water is siphoned ashore by the natural pressure of the deep sea, flowing through a titanium heat exchanger before it is returned to the ocean, causing no harm to the environment.
