Windward energy Lithuania

Overview

How much electricity does a wind farm produce in Lithuania?

In 2022, Lithuania's wind farms generated 1.51 terawatt hours (TWh) of electricity, or about 11% more than in 2021, when they generated 1.35 TWh. Last year, electricity production at wind farms almost reached the level of 2020, when a record of -1.55 TWh was set in the history of Lithuanian wind energy.

How to develop offshore wind energy in Lithuania?

"In order to develop offshore wind energy in Lithuania, it is necessary to prepare properly and in time for the wind farm tender, to present the project to the public, to clarify all the necessary processes and criteria.

When will Lithuania's first offshore wind farm start?

The first offshore wind farm planned for the Baltic Sea off the coast of Lithuania is gradually taking shape, with the draft Law on Offshore Wind Energy published by the Government last year providing for the first auctions to be launched in early September 2023 and for electricity production to start by 20-21 January 2030.

How has 2023 shaped Lithuania's wind energy sector?

By Baltic Wind | January 5th, 2024 | LITHUANIA, OFFSHORE, TOP NEWS The year 2023 marked a dynamic and transformative period for Lithuania's wind energy sector, shaped by significant milestones and groundbreaking achievements.

Does Lithuania have a wind power plant?

Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania. With installed wind capacity of 178 MW in 2016, and an average power consumption of 1.1 GW, Lithuania was the EU Member State with the highest level of new wind capacity installed in 2016

relative to its power consumption.

Will Lithuania's offshore wind ambitions be boosted by a 193 million EUR scheme?

A major boost to Lithuania's offshore wind ambitions came with the European Commission's approval of a 193 million EUR scheme.
