

## Solar Energy South Africa

# Wugang Solar Power Station

## Overview

---

How many ground-mounted PV power stations are there in China?

According to our dataset, China has a total of 2467.7 km<sup>2</sup> ground-mounted PV power stations in 2020. The top three largest provinces refer to Xinjiang, Inner Mongolia and Qinghai, whose PV area ratio are 14.92%, 12.49% and 11.26%, respectively, with a total of nearly 40% of all the PV power stations of China.

Why is a solar power station in Dunhuang important?

That is equivalent to releasing environmental benefits from 667 hectares of forest, while creating economic benefits of 300 million to 400 million yuan at the same time. Industry insiders said the establishment of the power station in Dunhuang is an important milestone in the development of China's solar thermal power industry.

Where is China's new solar power station located?

Located in Fuyang City of east China's Anhui Province, the new PV power station is constructed in a flooded area once used for coal mining of 867 hectares, with an overall installed gross capacity of 650,000 KW. With 1.2 million PV modules, the solar farm boasts an area equivalent to the size of 1,300 standard football fields.

Does China have a spatial map of PV power stations?

Although some researchers released several PV power station maps, most only met a medium resolution of 30 meters [9, 10]. There thus still lacks a national map of China's PV power stations with a higher spatial resolution (i.e., 10 meters) that could provide a global understanding of PV's spatial deployment patterns.

Where are PV power stations located in China?

It should also be noted that with the rapid development of China's PV industry, increasingly more eastern provinces built large-scale PV power stations,

including Jiangsu, Anhui and Shandong Province. Areas of PV power stations for each province of China.

What is China's largest floating PV power station?

China's largest floating photovoltaic (PV) power station, Anhui Fuyang Southern Wind-solar-storage Base floating PV power station, achieved full capacity grid connection on Wednesday.
