

## Solar Energy South Africa

# Zhenchuang won the bid for photovoltaic bracket

## Overview

---

How many photovoltaic panels did China build in 2023?

In 2023, China built more than 216 gigawatts of photovoltaic panels, more than the entire capacity in the US. Translation of an original article published in French on lemonde.fr; the publisher may only be liable for the French version.

Why is China accelerating the installation of solar panels?

The country is speeding up the installation of solar panel fields on its territory at an unprecedented rate, both to get away from dependence on coal and to absorb its production. In 2023, China built more than 216 gigawatts of photovoltaic panels, more than the entire capacity in the US.

What happened to solar panels in China?

Back in the early 2010s, Chinese interest in the energy transition industry created a solar panel tsunami. Cities and provinces all wanted their own factories, giving local entrepreneurs low-cost land and easy credit. A Chinese group, Suntech, became the world leader, while the German players disappeared. Suntech in turn filed for bankruptcy.

How does photovoltaic technology benefit future generations?

"The development of the photovoltaic industry, alongside desert control, benefits future generations," Qin noted, adding that the project not only generates electricity and stabilizes sand but also enhances local income levels. To support this project, related departments and enterprises also join in the irrigation efforts.

Can versol mount a photovoltaic power station?

Versol's V-Basic mounting system can be applied to photovoltaic power station in different terrain and environment. The product range includes a wide range of models and styles, and is highly adaptable.

Why did Suntech go bankrupt?

A Chinese group, Suntech, became the world leader, while the German players disappeared. Suntech in turn filed for bankruptcy. For five years from 2013, the European Union imposed quotas and price floors on Chinese panels in an attempt to save its own industry.
