Determination of structural carbohydrates and lignin in ...

The chemical composition of extractives-free
samples was then quantified according to the
standard protocols established by the National
Renewable Energy Laboratory (NREL) (Sluiter et
al. 2011

[Analytical Methods](#)

optimized procedure published as NREL/TP-510-42618.7,8 This procedure enables the determination of cellulose and hemicellulose based on their monomeric compounds. Lignin can be calculated as acid-soluble lignin (ASL) and as acid-insoluble lignin (AIL). Due to the different chemical structures and polarities, the biomass-derived

Determination of optimal biomass pretreatment strategies for ...

The total composition analysis of biomass was also conducted using the standard NREL method (NREL/TP-510-42618) for comparison. The total composition analysis of the biomass indicates the dominance of cellulose (Fig. 3 c) and confirms the earlier observations that cellulose dominates hemicelluloses by nearly twofold, and that the lignin content

Functional identification of carbohydrate-binding module 13 and ...

Hemicellulose content in the gramineous plants
were determined according to the
NREL/TP-510-42618 [6], as shown in Table 1. In
brief, a sample of 0.3 g dry biomass was
hydrolyzed at 30 °C with 3.0 mL H₂SO₄ (72 %, w/v) for 1 h. Then 84 mL of deionized water were
added, and a second hydrolysis was carried out
by autoclaving at 121 °C for 1 h.

DETERMINAÇÃO DO TEOR DE LIGNINA DO ENDOCARPO ...

Hidrólise ácida e determinação da lignina total - A hidrólise foi realizada segundo a Norma NREL/TP-510-42618 (2012), com modificações apropriadas. Basicamente, o experimento consistiu em transportar para um frasco cerca de $300 \pm 0,1$ mg da amostra, livre de extrativos e previamente seca a 103 ± 2 °C (Norma TAPPI T-204 cm-97, (2007

Validación del método de cuantificación de lignina en biomasa de ...

La presente investigación consistió en la validación del método «Determinación de lignina en biomasa» basada en la metodología NREL/TP-510-42618 del Laboratorio Nacional de Energías

NREL TP-510-42618 Determination of Structural Carbohydrates

Este documento presenta un procedimiento analítico de laboratorio para determinar los carbohidratos estructurales y la lignina en biomasa a través de una hidrólisis ácida de dos pasos. Los carbohidratos se hidrolizan en formas monoméricas que se miden por HPLC, mientras que la lignina se fracciona en material insoluble y soluble en ácido. El procedimiento es adecuado
