ZNL Energy's PPS battery separator ends lithium-ion fire hazard

ZNL Energy has developed the ZNL-NP15 lithium-ion battery separator made of polyphenylene sulphide (PPS), a chemical and heat-resistant plastic material. The fire safety properties of the ZNL-NP15 make it ideal for use in all types of lithium-ion batteries. In particular, the separator increases fire resistance by inhibiting short circuiting.

Business Norway

ZNL Energy provides zinc-ion battery cell technology for stationary energy storage. Applications range from home energy storage to industrial-scale projects, including renewable energy. The technology uses abundant, recyclable, sustainable and fireproof materials, resulting in a high-quality, low-cost battery that meets all market requirements.

Jan Børge Sagmo skal hente 20 millioner kroner til ZNL Energy

- ...

ZNL Energy er et selskap som har og utvikler rettigheter til sink-ion battericeller samt en separator som reduserer brannfare og øker levetiden på batteriene. Den passer til alle litium-

ion batterier. Selskapet startet i desember 2021, og Sagmo gikk inn som investor i januar 2022. Han startet å jobbe der i september 2022, etter at han ga seg

Ble utbrent, men nå har han ladet ferdig: Jan Børge Sagmo blir

De siste årene har litium seilet opp som det foretrukne råstoffet i batteriproduksjonen, og mange frykter nå at dette skal bli en mangelvare i årene som kommer. Det er her sink-batteriene til ZNL Energy skal komme inn som et supplement. - Når litium blir vanskelig å få tak i, bruker vi sink i stedet, sier seriegründeren.

ZNL ENERGY AS

ZNL Energy's technology is a disruptive innovation that could potentially transform the battery industry. Our separator can prevent the flow of electrons in the event of a thermal runaway, which is a phenomenon that can occur when a battery overheats and can cause a fire or explosion.
